Course Description:

This course offers an analysis of corrections in the Canadian Criminal Justice system and explores the history of punishment, environmental conditions, staff and inmate safety, special needs, gang control strategies, reintegration of offenders, control management, treatment, supervision, and the duties and responsibilities of the correctional system. It will provide students with the base of knowledge as it relates to the correctional setting and the community at large. Special emphasis will be placed on prison gangs and correctional issues including intake, classification, communication and trends.

Learning Outcomes:

As a result of active participation in these sessions, a student can expect to:

• Discuss the history and philosophy of correctional institutions in Canada and how they have evolved over time;
• Compare and contrast the different perspectives on crime, criminal offenders, and the criminal justice system;
• Describe the models of corrections that have evolved over the past two decades and compare and contrast each of these models;
• Describe the legislative framework of the current correction system and outline its structure;
• Identify and explain the various laws governing correctional practice and operations;
• Critically evaluate each of the alternatives to confinement;
• Differentiate between probation and parole;

• Discuss the roles, responsibilities, and training of correctional officers;
• Discuss the process of classification and risk assessment;
• Explain CSC’s Integrated Correctional Program Model;
• Describe the types and process of conditional release;
• Critically assess the challenges confronting correction systems in the 21st century.

Course Format:

This course uses a variety of teaching/learning methods including discussion, personal reflection, experiential exercises, student presentations, role-plays, group activities and especially case studies. Our faculty aims to create a learning environment where the learner is actively engaged in inquiry, critical thinking and problem solving. The classroom provides you with a place where you can learn with and from others in a cooperative and collaborative manner.

You are expected to take a very active part in class discussions and take responsibility for your own learning. Be a positive and co-operative team member. Columbia College uses a facilitation model of instruction where the facilitator’s role is to facilitate your learning. The expectation is that you will come to class prepared with pre-class homework completed. Your facilitator will engage you in activities that are based on your completed homework and readings. Your enthusiastic and positive approach in the classroom will create an atmosphere that will help every student develop the knowledge, skills and attitudes that are needed for success.

How you conduct yourself in our classes will, to a large extent, mirror your conduct in society and your future work site. For example, if you have a tendency to ask questions, challenge the ideas of others in a respectful manner, draw out the best from your colleagues, and encourage both group development and task accomplishment in this class, it is likely you will do the same at work. A high level of student involvement and developing professionalism is expected in the classroom as you work towards your goal.
